

Country: England

Topic & Committee: Commission on the status of Women

Human trafficking is the process of trapping people through the use of violence, deception and exploiting them for financial or personal gain. People can be trafficked and exploited in many forms.

Cause

We as people of England believe that discipline of several countries in this field is not good. Beside government, it is private sector which is taking over on the women of our country. All the men trafficked & women for financial or personal gain.

Current Status

Even though England is a good country and a destination country but all the women is not save here. Men & uses the advantage of women mostly and the women are helpless at that time.

Solution

England has a developed army, so we should have a tight security mainly in the night and should develop an app so that they can use it, train women for their protection, and put the criminals in the imprisonment and put to death.
