Situation of Russia and Ukraine Crisis –  
Diplomacy or Continued Crisis?

# The fallacies of wars

The blood soaked lands of Ukraine and cries of all the people who have lost someone near to them, is a vicious cycle. With the political cards playing well, the crushed common man weeps. Only if the world leaders handled the chaotic scenario, some other way. Should there be words and peace, instead of guns and filth.

To analyse, the western media has influenced the people residing across the world. Where the entire fraternity is covering the pathetic state of Ukraine, there is null absolution to understand the Russian point of view. The war waged, was an attack induced. As per the NATO code, the member nations can deploy their militaries inter-land. This further implores threats of national security for a cold-war fiddled nation, Russia.

To defend one's own sovereignty, nationality, and land is a basic fundamental. Russia has taken forward only the token of secure governance. A deed anyone would do for their family, and what is a nation? A multitude of families united under a flag. However, inarguably, the process chosen is too harsh.

Taking a microscopic view on the war, one analyses, this war is not between Ukraine and Russia, it is a war between Russia and NATO's ulterior motives, with the sacrificial memento being Ukraine. With the people being affected massively, we sympathise. However it is of equal importance to understand the pathetic state of soldiers, who also are humans, functioning as heartless souls, due to propaganda.

The main source of economical growth of Russia is by supplying gas and petroleum, supplied by pipelines, going through Ukraine. Ukraine demanded of 33 billion yearly and Russia agreed but now it will be a major problem if Ukraine don't allow their pipelines to pass. In 2021 Ukraine's financial growth had decreased by 4 percent and it is estimated to decrease further by 45 %.

There are no winners in the wars.

# A conflict: rage yet veiled

Are the Ukrainians only meant for unfair practices by Putin? Why suddenly Russia wants Ukraine back? From past four months the war between Russia and Ukraine is being continued, the invasion of Russia in Ukraine doesn't seem to stop soon.

If we really want to understand the sudden tension between the two countries, we must take a peek into its past. Ukraine was a part of USSR along with 15 other countries including Russia, Ukraine attained the independence in 1991. After reading this you might think that this is the same story of India, Pakistan and Bangladesh before 1947 but it is not, as in 1921 Lenin's Red army invaded Ukraine and after one year in 1922 the USSR was formed.

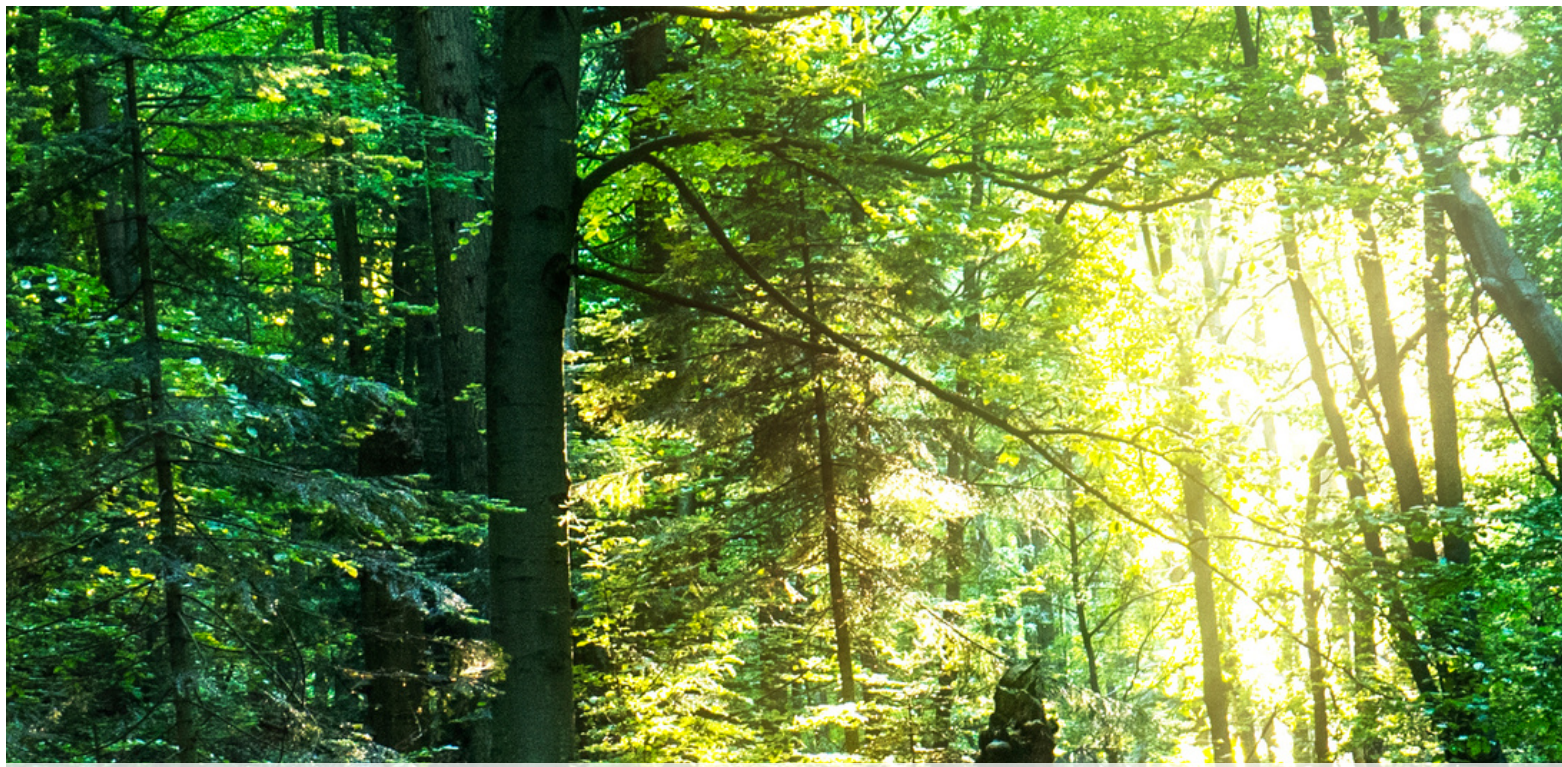

Now the question arises that what was Ukraine before 1921? Well in 1918 it got independence from the Russian empire. The interesting concept starts after 1991 when the Soviet Union was divided into different countries. After 1991, there are people divided into 2 parts, one which wants to join Russia and one which wants to join NATO, after these some surveys happened and we got to know that 68% of populations want to join NATO while the others want to join Russia.

The USA and European countries have given a warning call to Russia for not to invade Ukraine. Countries like China have supported Russia, while some countries have still not formed an opinion over this situation. Putin has said in an interview that he always considered Ukrainians and Ukraine as a part of Russia, as it plays a crucial role in their history. The question arises that why these countries haven't formed these opinions yet? The clear answer is that these countries are either protecting the citizen's that are stuck in Ukraine or they are profited from both the countries and they don't want to ruin that relationship. Clearly, Ukraine doesn't want to join Russia and wants to join NATO but, Russia is highly objective towards it.

Russia has done a same thing in past in 2014, a similar situation was there but this time the risk of Ukraine joining NATO is higher. At last, I would conclude this by writing that sudden tension between these countries is because of Ukraine joining NATO shows that Ukraine wants to be an independent nation and wants to take its own decisions and by doing wars Putin only destroys the economic system of country but not the unity of people except the variations

## The Convention on Biological Diversity and its contribution to Sustainable Development

# Diversity for Representation

Is Biological Diversity really important? What are the benefits of it?

Chandrasnigdha Das explores the facts and implores her opinions on the Convention on biological Diversity and its Contribution to Sustainable Development.

What is Convention on Biological Diversity and when it was adopted and where?

Convention on Biological Diversity (CBD) is known as misual understanding or a treaty to conserve biological diversity and sustainable use of its component and adequate sharing of the benefits arising from genetic resources. During the Rio Art Summit in 1992, 22 May it was adopted. Within one year 168 countries signed this treaty and it was brought into force in 29 December 1993.

The main three objectives of this convention

Conservation of Biodiversity,

Sustainable use of Biodiversity,

Fair and equitable sharing of the benefits arising from the genetic resources.

I think in our biological world each and every part has its own value and these are important for humankind, for which we should take importance on its conservation.

Biological Diversity is important as it protect plants , animals, microbial and genetic resources for food production. Ecosystems function such as recycling nutrients, soil erosion , pollinating crops and trees.

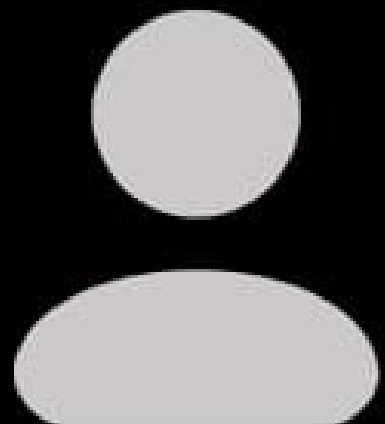

Biodiversity is also important for sustainable development and humans' well- being. It helps in the production of food, fiber, water. It is also helping us in the climatic changes and its bad effect.

Nowadays global warming is a common phenomenon for which it is difficult to survive for common kind.

So, if we do not conserve biodiversity, if we do not go for plantation, the future of the human civilisation will be very dark.

## Investigating the existence of Chinese Concentration Camps for Uyghur Muslims

# Begrudged Uyghurs: China unwise?

Diary,

As I write to you, my heart aches. Look, how I didn't pour my affection onto you today. What I am going to talk about, is just the same. The clemency of us humans is heightened to an extend, we go mirage. The illusions of dominance have stirred our minds, into a direction, destroying our very being. Receptivity of emotions, is even animal, but to be functional with wisdom is human. That is what separates us, says philanthropy. But, everything is stagnant, as I take a horizon's view. What separates us today, is sheer negligence and hatred. A persona of divide - that is what we are.

You might wonder, what the subject is. The subject is beauty of ethnicity. My identity is my culture, something I admire. China, although a country I gaze with despise, inarguably is a cultural hub. It's traditional and ancient roots prosper it's modernized segment. However the same country sheds wrath over ethnicity.

Uyghurs, are another set of humans facing the same wrath. Uyghurs are predominately Sunni Muslims. Historically, Islam came to the region in the 10th century. Prior to Islam, the Uyghurs embraced Buddhism, Shamanism, and Manicheism.

China has been accused of committing crimes against humanity and possibly genocide against the Uyghur population and other mostly-Muslim ethnic groups in the north-western region of Xinjiang. There is also evidence that Uyghurs are being used as forced labor and of women being forcibly sterilized. Some former camp detainees have also alleged they were tortured and sexually abused. China denies all allegations of human rights abuses in Xinjiang, claiming its system of "re-education" camps are there to combat separatism and Islamist militancy in the region.

While it is absolutely correct to solve militancy and militia, the approach, is miserable. You do not beat heinousity with monstrosity.

That is all I can write, for words do not suffice. To imagine, is wrenching. To survive must be the harshest. I wonder if the delivery men of atrocities ever wash their hands.
