News Letter

International Press

Introduction

The International Press Delegation (IPD) serves as the international press corps at MUN. Each Reporter will investigate specific committees and council activities.

Aamna Ali

About Me

My name is Aamna Ali my thinking is simple living and high thinking. I am a common girl to express my views as if people feel that if you express your views then it is a debate but the new generation does not accept this as a debate, it says that I am keeping my points.

ECOSOC

Intro

We could not have predicted that conflicts over water would overtake wars over regions. The idea of fighting conflicts over resources to feed the population is now more than just a theory. Nations ran behind their economic progress and have entirely forgotten how crucial it is to maintain and preserve the natural resources.

None of us anticipated that a conflict would serve as the catalyst for us to realize how crucial it is for all countries to have access to affordable, dependable, sustainable, and contemporary energy.

Conclusion

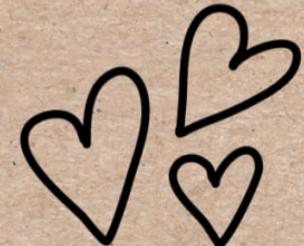

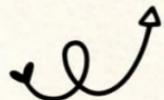

In order to identify and encourage effective implementation of solutions to the energy dilemma, the Economic and Social Council examines problems of global significance pertaining to economic and social challenges. The attainment of the SDGs and placing severe rules on MNCs for coal procurement were some of the measures suggested.

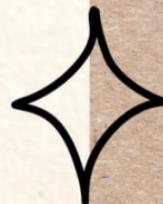

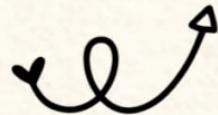

Q/A

Q- "Air pollutants and greenhouse gases often share the same sources and can be even more dangerous when combined. African governments could prevent 200,000 premature deaths per year by 2030 and 880,000 deaths per year by 2063," said UNEP. Why is Africa not doing the best for its citizens so that they could live in a sustainable environment?

A- South Africa's government is working towards it. We are already aware of the situation and South Africa promises to closely work with the UN.

Intro

Climate Adaptation refers to actions that reduce the negative Impact of climate change, while taking advantage of Pedential now opportunities. It involves cutjusting policies and actions based on expected changes in climate.

Pavement infrastructure is experiencing pated climate conditions caused by globalawrning. Extreme weather events, such as precipitations, are increasing in intensity and frequency, creating rising concern

Q/A

Que - What are the 5 biggest problems facing the environment today?

- Ans- Ozone depletion
- Greenhouse effect
- Global warming.
- Deforestation
- Desertification
- loss of biodiversity

UNITED NATIONS
GENERAL ASSEMBLY

UNGA

Intro

Nuclear waste is the remaining radioactive material moved into the upper environment following an atomic import. It basically refers to the radioactive dust and ash created when a nuclear weapon explodes.

Conclusion

The reason that storing nuclear waste is a large topic of current discussion is due to half-lives of certain radionuclides produced from fission of Uranium, ranging from day to 14 billion years.

Understanding

Radioactive waste is hazardous because it emits radioactive particles which if not properly managed can be a risk to human health and the environment.

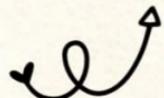

Q/A

Q. How does nuclear reprocessing work?

Reprocessing is a series of chemical operations that separates plutonium and uranium from other nuclear waste. Contained in the wed fuel from nuclear Power reactors. *About Commercial nuclear Reactors - need Water The first that do not need water.
