### ALL. INDIA. POLITICAL. PARTY. MEET

Manish Sisodia ( Indian Politician)

### Topic: Discussing the process of opening the lockdown and stabilising the economy.

We all know that India is a huge country. The second most populated country in the world. During this pandemic the cases has Been rising rapidly and India is facing problems in the economy.

If this lockdown is fully opened it will the cause a lot of problems. The cases then wouldn't be under the control of the government. Our country has poverty so it is causing a lot of problems to those who have minor jobs like cleaning selling cashcrops , etc.

This lockdown must be opened but in a way that our country's economy is also stabilised and people are also not much affected. Strict rules must be applied that only the people of green zones with zero cases are allowed to take their step out.

Otherwise all the sectors under the orange zone and the red zone may remain sealed. Once the recovery percent becomes higher than the confirmed cases and the sector has no case for at least 20 days then that sector can be opened but still with high precautions. The economy level will take 1 or 1.5 year to again rise up but our citizens and the natives must be secured that is most important.
