

UNITED NATIONS- UNITED NATIONS GENERAL ASSEMBLY

Country - JAPAN

GEOGRAPHICAL LOCATION

Japan is an island country in East Asia. Located in the northwest Pacific Ocean, it borders the Sea of Japan to the west, and extends from the Sea of Okhotsk in the north to the East China Sea and Taiwan in the south. Japan is part of the Pacific Ring of Fire and comprises an archipelago of 6,852 islands covering 377,975 square kilometers (145,937 sq mi); its five main islands, from north to south, are Hokkaido, Honshu, Shikoku, Kyushu, and Okinawa. Tokyo is the country's capital and largest city; other major cities include Osaka and Nagoya.

Japan is the 11th most populous country in the world, as well as one of the most densely populated and urbanized. About three-fourths of the country's terrain is mountainous, concentrating its population of 126.2 million on narrow coastal plains. Japan is administratively divided into 47 prefectures and traditionally divided into eight regions. The Greater Tokyo Area is the most populous metropolitan area in the world, with more than 37.4 million residents.

Agenda – Consequences of Pandemic

This agenda is plan to discuss the most difficult situation; the consequences of pandemic-covid 19 in Japan.

All over the world almost each and every country is fighting against this deadly virus, many people died due to this virus and scientists / governments are still finding the solutions for this. Business, schools, colleges, offices etc. are shut down. Lockdown is the only safety measure against prevention of spreading it. According to TDB (TEIKOKU DATABANK), more than 10,000 companies across the Japan would have negative impact on the business performance.

Unfortunately, the country would face the consequences of Tokyo 2020 Olympic and Paralympic Games' one-year postponement.

The coronavirus outbreak is tremendously damaging to Japan's economy. Japan's economy slipped into recession for the first time in 4 ½ years.

People are working remotely to continue to earn money and fulfill their basic needs and to run the economy. The workaholic culture of Japan is switching to online working because of this virus.

The range of businesses and services now moving online is wide, from publishers making manga comic series available online to the Ministry of Health, Labour and Welfare teaming up with LINE Healthcare and Mediplat to launch an online health consultation service.

Remote working and the revitalization of the online economy can serve as crucial points in envisioning the future course. We need to prepare post corona era. It is a big question for all of the countries.

We all need to work with this corona virus taking all safety measures. Schools, colleges must go through online platform. Business, private or government office should continue on time bases or alternative days. We will have to start working on a crisis management to handle any such crisis in future. Have more budgetary allowances for medical care n recovery post corona.
