

Committee :(UNHRC)

United nations Human rights council

Agenda : In vestigating the existence of Chinese concentration camp for Uyghar Muslims

Country : Armenia

Introduction,

According to the precised agenda, we need to know about the Chinese concentration camps first, what are these camps ? For what reason are they made? What are its hazardous effects on yughar Muslims? There will be a never ending list of questions for this. These camp are native of Xianjiang where they are officially called as 'vocational education and training centres' or detention camps . They violent the basic Human Rights. The camp commit genocide and crimes against humanity. They are made just for the minority people of Uyghar Muslim community to torture them and shoot them at site. Uyghar Muslims are usually a Turkish ethnic group affiliated with general region of Central and East Asia.Uyghar's are sound mostly in the Xinjiang region of China and many other countries, but they are treated mostly in China's concentration camp.

# Body,

Armenia being a close friend of China due to their trading with each other depends on how well informed they are about these camps. If they think there is some genocide going on or systematic ethnic cleansing, then they are informed the Chinese government is cracking down on opposition regardless of who they are or what religion they follow. Armenians are been informed about all the mall practices in China they are miss guided and not correctly informed.

One of the Armenian 'Venerable Pannanatta' says that this is China's internal affair and most of armenians are not interested in this. He personally recognise, China is right to oppose Islamic terrorism on it's territory.

The history of Armenia tells us about how they also suffered from genocide in their country when they were part of Ottoman Empire. They suffered the same pain what Uyghar Muslims in China face today. They were genocide by Turkish Muslim and so they do not care about Muslims being hurted and abused , sterilized or forced to work and killed badly .

According to my point of view, a friend knows a better way of convincing its friend ,China and Armenia are good friend and the Armenia can convince Xinjiang not to be a unhuman with uyghur Muslims.

As Armenia was first a part of Turkey , where current they there are 98% of Muslims and is an Islamic country, it can ask China to send all the Muslims to Turkey .

After all it's the part of humanity so Armenia should step into it carefully and wisely.

# Conclusion,

In the above description, I delegate of Armenia has informed about a short explanation of camps for Uygher Muslims in China and what all practices they practice in Xianjiang which violent human rights of Uyghar Muslims in China. It includes some armenian views on the camps and my solutions for Armenia.

THANK YOU
