

POSITION PAPER

COUNTRY : ITALY

COMMITTEE : United Nations Security Council

TOPIC : Bioengineered Terrorism and Ways to Combat.

The intentional release of biological agents for harming humans, living beings & animals to coerce a government or civilization due to political or social objectives causing mass casualties, widespread panic & significant economic disruptions globally. The delegates are compelled to engage in peer views to engage gaps in security.

Italy has strict law monitoring the sale of DNA synthesizer & high end lab equipment preventing DIY engineering of dangerous viruses and bacteria. Italy is also a signatory of the international treaty of BIOLOGICAL WEAPONS CONVENTION that aims in banning biological & toxin WEAPONS prohibiting their development and transfer.

Italy is a strong proponent of the BIOLOGICAL WEAPONS CONVENTION giving efforts in order to strengthen the treaty & implementing strict export controls on dual use items in live with EU regulation 2021/821.
