

JAPAN

TOPIC: War situations between India and China and the consequences if the war breaks out.

The delegate of Japan would like to share a speech about the war situations between India and China. During the epidemic of COVID – 19, China has been willing to destroy or rule over India. India on the other hand is a developing country and has good facilities for military forces. India had to fight against China because China also wants to rule over India and India is a democratic country and China is a monarchy country. The clash (war) began on 5th May 2020 at a beach of Pangong Tso, a lake shared by India and Tibet (a country in which China is in control.)

Japan firmly believes that the war between India and China is happening because the war was the dispute over the sovereignty of the widely separated Aksai Chin (a state of China) and Arunachal Pradesh (a state of India) border regions. Aksai Chin, claimed by India to belong to Kashmir and by

China to be a part of Xinjiang , contains an important road link that connects the Chinese regions of Tibet.

In the recent news updates, it is saying that India has a chance to win the war because India has killed many of the generals and personnel of the Chinese army.

Casualties and Losses between India and China war

<i>India</i>	<i>China</i>
<i>1383 Dead</i>	<i>722 Dead</i>
<i>1047 Wounded</i>	<i>1697 Wounded</i>

Japan, a vary powerful country is supporting India because Japan is a good friend of India. India is the largest recipient of Japanese and both countries have a special relationship Official Development Assistance (ODA). Japan doesn't want to be with China because China wants to rule over the South China sea but the South China sea is only sea that connects Europe and Asia for importing and exporting goods. Most of the Asian countries like Japan and Israel do not want to help China do this or else they will not be able to do the business and will become poor. Like if there is a lot of electricity in Japan but there are no laptops and many laptops are in France. So how will Japan trade with France for laptops if China rules over the South China sea? That is why, many of the countries are in India's side, not in China's side.

However there will be a major loss of soldiers, generals and nuclear weapons. Maybe this Indo – Sino war will become even more dangerous than the world war II. Maybe this war will become The World War III because the countries which are totally dependent on China (like Turkey) will be in China's side and the other countries will be on India's side. This war is not between India and China, but this is a war to stop China from taking over the South China sea. At the end of the war, many cities would be ruined, many country's economy would be ruined, millions of people will die and billions of people will be wounded. Many children will become

fatherless and many mothers will become childless. Many ladies will become a widow and many will loose their brothers. The delegate of Japan would like to give an opinion. We should immediately consult this to the United Nations Organization (UNO). The judges will take out the solution for the problem. However the challenges ahead are numerous. We need to make a vaccine for COVID – 19. Japan is willing to see who will win the Indo- Sino war. We will help India whenever needed and will take the revenge of COVID- 19 and defeat China. (As China created the COVID – 19 disease and China and Japan are already enemy countries.)
