

Position Paper for France

Forum: G20 Summit

Topic: Building a Sustainable and Resilient Future

Country: France

Summary:

France recognizes the urgent need to address global challenges such as climate change, inequality, and economic instability. We believe that international cooperation and collective action are necessary to build a sustainable and resilient future.

France's Priorities:

1. **Climate Change and Sustainability:** France commits to reducing its greenhouse gas emissions by 40% by 2030 and aims to achieve carbon neutrality by 2050.
2. **Global Economic Governance:** France supports the reform of global economic governance to make it more inclusive, representative, and effective.
3. **Social Inclusion and Inequality:** France believes that reducing inequality and promoting social inclusion are essential for sustainable economic growth and development.
4. **Digital Transformation:** France supports the development of a digital economy that is fair, transparent, and respectful of human rights.

Key Proposals:

1. **Global Carbon Pricing:** Establish a global carbon pricing mechanism to incentivize countries to reduce their greenhouse gas emissions.
2. **Global Minimum Corporate Tax:** Implement a global minimum corporate tax to ensure that multinational companies pay their fair share of taxes.
3. **Digital Services Tax:** Introduce a digital services tax to ensure that digital companies contribute to the tax base of countries where they operate.
4. **Green Investment:** Mobilize \$1 trillion annually to support green investment and sustainable development in developing countries.

Conclusion:

France is committed to working with G20 partners to build a sustainable and resilient future. We urge all countries to work together to address global challenges and promote a more inclusive, sustainable, and equitable world.

Recommendations:

- Encourage countries to increase their climate ambition and implement policies to achieve their Nationally Determined Contributions (NDCs).
- Support the development of a global digital economy that is fair, transparent, and respectful of human rights.
- Promote social inclusion and reduce inequality to ensure sustainable economic growth and development.
